

## Case Study

**Client – Live Nation**

**Venue – Jazz Café**

**Project – Switch Room and Mechanical Plant Supplies**

**Architect – n/a**

**Consultant – n/a**

**Project Value – £11k**

After years of water seeping in from London's leaky mains pipes, it became essential to protect the electrical distribution system in this high profile venue.

Care was taken to design and install replacement distribution, contained within a custom IP65 enclosure, that now contains the venue's electrical distribution equipment.

This venue works seven nights a week, 52 weeks of the year and these ambitious works were achieved during a single one night slot.
