

## Case Study

**Client – Chris Makin**

**Venue – Makin Farm**

**Project – Electrical Distribution Systems**

**Architect – n/a**

**Consultant – n/a**

**Project Value – £150k**

Proof that entertainment venues aren't the only string to our bow, we recently designed and installed complex mains distribution systems for Makin Farm, a potato packing factory in Leeds.

Founded by the entrepreneurial Chris Makin, five of the factory's giant potato packing sheds required considerable electrical expertise to deliver power to numerous items of plant and machinery that had been sourced from various countries around Europe and the world.
